Canada Announces Sweeping Tariffs on Elon Musk's Teslas and American Red States in Response to Trump's 25% Canadian Tariff

Featured

CANADA ANNOUNCES SWEEPING TARIFFS ON ELON MUSK'S TESLAS AND AMERICAN RED STATES IN RESPONSE TO TRUMP'S 25% CANADIAN TARIFF

Trump had threatened to place a general 25% tariff on Canadian goods and a 10% tariff on Canadian energy.

Prior to being elected, Donald Trump promised tariffs on Canada, but the threat was not taken seriously. On January 31, 2025, [Trump announced a 25% tariff on Canadian goods, 25% on Mexican goods and 10% on Chinese goods](#). He had said those tariffs would go into effect Saturday, February 1 but has since pushed the effective date to the upcoming Tuesday.

Chrystia Freeland, Canada's former finance minister, said in an interview with The Canadian Press, "We need to be very targeted, very surgical, very precise." Freeland, who's also a Liberal Party leadership contender, has concluded that direct aggressive action through the door is the only way to deal with Trump. She has suggested putting a "100%" tariff on Tesla which could ultimately decimate the company's presence and profits in Canada.

RIDDLE ME THIS

What is the answer to the riddle? Take some time, kick back and mull it over with your favorite drink and a friend. Relax a little.

The Hint: Your guess is as good as mine.

Email your answer to be featured in the next issue's answer reveal.

Last Issue's Answer Reveal: "T H A T" is how you spell "that" without four S's and four I's.

If you drop me I'm sure to crack, but give me a smile and I'll always smile back.

What am I?

THREE JEWELS

You are somebody different in the mind of each person who knows you.

The best time to do anything is now, before the doubt begins to win.

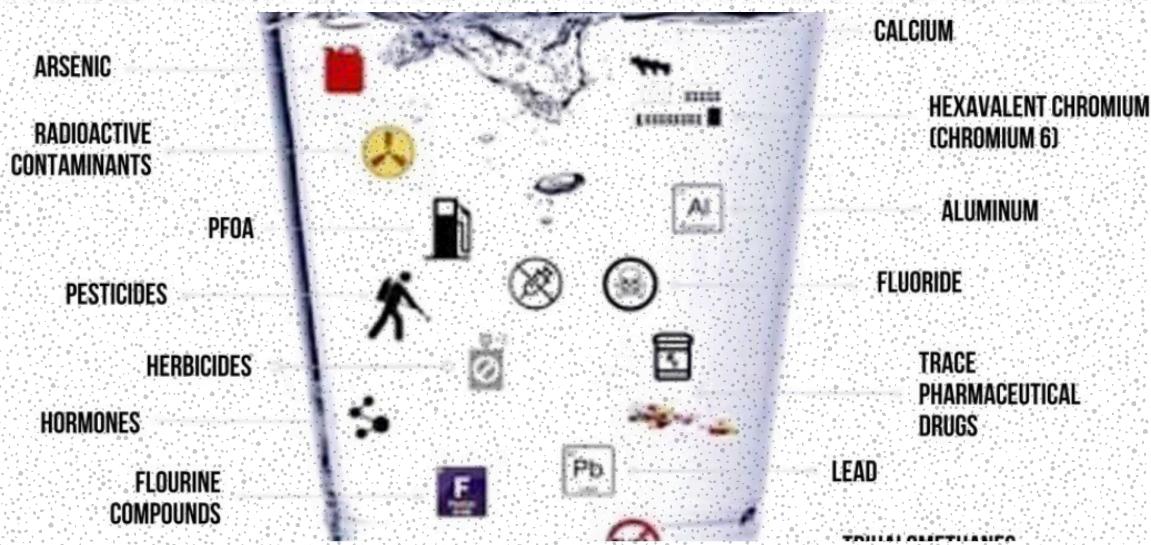

There are stars in the sky at night and a sun in the sky in the daytime, so there's always a reason to keep your head up.

POISONED PIPELINES AND DRUGGED WATER: THE RISE IN AUTISM SPECTRUM DISORDER

Although it is generally accepted that tap water is as safe as bottled water, tap water travels miles through pipes that haven't been changed or cleaned in decades. Before it reaches your home, it's intentionally and unintentionally mixed with chemicals which are increasingly pharmaceuticals. With people taking in these chemicals through their water every day for a lifetime, the buildup of these toxic substances in organs and muscle tissue may prove to be more detrimental over time for people and developing fetuses. As more chemicals appear in drinking water at higher levels, developmental disorders like Autism Spectrum Disorder (ASD), have increased 175% over the span of a decade, according to AutismSpeaks.org. Doctors and scientists have no answers but have ruled out needles as the primary cause of ASD. In times like these where there is an increase in disease or disability with unknown causes, it's important to recall how water played a part in past epidemics and to examine what is exactly in the water we drink and where it comes from.

A local government agency usually maintains water pipes through pressure monitoring, leak detection, chemical treatment, pipe flushing and pipe replacement. The average pipe system in America is on average 45 years old. It's been estimated that most water pipes need to be changed once every 75 to 100 years. A majority of pipes systems are reaching the end of their suggested lifetime, and it is time to start factoring in the ailments these pipes may be causing. We should also be questioning why government officials are thinking about recommending safe drinking level limits for body care products in water.
